

WHY 95% PHOENIX COMBI?

INSTALLING CONTRACTOR

BENEFITS

Lower Cost, Less Complicated Hydronic Installation

- High mass, direct pump system

One system for air handlers, radiant or convectors.

Very Reliable/Durable

- Spark Ignition
- Ultra High Grade Stainless Combustion Cap
- Electronic LWCO: Avoids Possibility of Dry Firing Heater

Load Matching Modulation for Long System Life and Reduced Cycling

Flexible PVC Venting

- 100" Equivalent Venting Each Way
- Unbalanced Fluing Permits many exhaust/intake variations

Separate Outlets for Heating and Hot Water.

Very Small Footprint: 24"x 34" Zero Clearance (55 & 80 gallon)

Super Quiet Operation

Optional Electric Backup: 110V or 220V

Three Tank Sizes

- 55 gallon
- 80 gallon
- 119 gallon

Three BTU Input Sizes

- 100,000- 33,000 Btu (July 2006)
- 130,000- 43,000 Btu (July 2006)
- 199,000- 66,000 Btu (September 2006)
